NONWOVEN MARKET OVERVIEW

The Vietnam Non Wovens Market was estimated at USD 1414 Million in 2025 and is projected to reach USD 2010 Million by 2032, growing at a CAGR of 5.2% from 2026 to 2032. This robust growth trajectory is primarily driven by increasing demand for non-woven materials across hygiene products, medical supplies, and filtration applications. As public awareness around health and hygiene rises, so does the need for disposable, cost-effective non-woven products, positioning the market for significant expansion.
